In a real knife attack the victim is usually seriously injured in the first second of the attack, and the fight is over within five seconds. Knife attacks are increasing in the UK and you need to know how to survive one.

Jim Wagner literally has the best knife defence system in the world, and elite units all over the world use his techniques and training methods. He has trained the Israeli Police Academy, the Finnish National Police Academy, FBI, the Brazilian GATE, Argentinean GOE, and even members of the London MET and SAS. **You can sign up for just Knife Survival or all of them.**
